

AKANKSHA BOLLA

akankshabolla7@gmail.com | [Github](#)

SUMMARY

Master's student in Computer Science with hands-on experience in full-stack development, AI/ML integration, and RESTful API design. Built multiple end-to-end applications leveraging React, Flask, Spring Boot, and cloud technologies. Research experience in automated test case generation using Generative AI. Actively seeking AI Engineering or Software engineering roles starting June 2026.

PROJECTS

Learnova – An AI powered learning Application

- Designed and deployed an AI-powered study assistant supporting 3 learning modes: summarization, flashcard generation, and practice Q&A.
- Integrated Hugging Face NLP models and Gemini APIs with custom prompt engineering, reducing study preparation time by ~50% in user testing.
- Implemented modular prompt templates that dynamically adapt to different subjects and difficulty levels, improving response relevance.

EmotiveChat – Emotion-Aware AI Chatbot

- Built a real-time sentiment-aware chatbot that detects 7 emotional states using a fine-tuned BERT model with 89% classification accuracy.
- Integrated BlenderBot for generative, context-aware responses, improving user satisfaction scores by 35%.
- Designed a clean React.js frontend with real-time emotion tagging displayed alongside chat responses.

Electro-Mart - E-Commerce Platform

- Architected a microservices-based e-commerce platform with 6 independent services (auth, product, cart, orders, payments, notifications).
- Built secure REST APIs handling user registration, product listing, cart management, and order processing.
- Containerized services with Docker and deployed to AWS, achieving 99.9% uptime during load testing with 200 concurrent users.

PROFESSIONAL EXPERIENCE

Texas A&M University

Nov 2024

Research Assistant

Corpus Christi, Texas

- Engineered a Generative AI pipeline to automate test case generation from requirements and user stories, reducing manual effort by an estimated 40%.
- Designed and iterated on prompt templates to produce structured, consistent test-case outputs aligned with SDLC validation requirements.
- Implemented automated validation checks on AI-generated outputs, improving clarity and requirement alignment by 30%.

Postulate Technologies

May 2022

Full Stack Web Development Intern

Bangalore, India

- Developed The Foodie Spot, a full-stack restaurant ordering system using Java Servlets and MySQL, supporting 500+ menu items and end-to-end order management.
- Built responsive frontend interfaces with HTML/CSS/JavaScript, reducing page load time by 20% through optimized asset management.
- Designed and integrated RESTful APIs for order placement, user authentication, and inventory tracking, ensuring seamless frontend-database connectivity.

EDUCATION

Texas A&M University - Corpus Christi

Master's, Computer Science

GPA: 3.5/4.0

GITAM University

B.Tech, Computer Science and Engineering

GPA: 3.6/4.0

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, HTML, CSS, SQL
- **Frameworks&Tools:** React.js, Flask, Angular, Spring Boot, Node.js, REST APIs, Git, Postman, Agile
- **AI / ML & NLP:** Hugging Face Transformers, BERT, Scikit-learn, Word2Vec, Feedforward Neural Networks, Gemini API, Prompt Engineering
- **Databases:** MySQL
- **Cloud & DevOps:** AWS, cPanel, Docker

CERTIFICATIONS

- **AWS Academy Cloud Foundations:** Eduskills
- **Introduction to Artificial Intelligence:** Coursera
- **Python and Django Full Stack Web Development:** Udemy
